

GENERAL PROCUREMENT NOTICE

The People's Republic of China

Liaoning Environmentally Sustainable Urban Development Project

Sector/sub-sector: Multisector/Water, Transport

GENERAL PROCUREMENT NOTICE

Loan No.: 00104

The People's Republic of China has applied for financing in the amount of RMB 1,460,000,000 from the **New Development Bank (NDB)** toward the cost of the Liaoning Environmentally Sustainable Urban Development Project (the Project), and it intends to apply the proceeds to payments for goods, works, consulting services and non-consulting services to be procured under the Project.

The Project supports the following two components:

1. Component I (Anshan): Component I will address water environment and urban flooding challenges in the city of Anshan through (i) rehabilitating the embankments of the Nansha River through ecological restoration and re-vegetation to create riverside ecological parks with “sponge city” features, which help absorb and capture rainwater for further utilization, reduce the pollution from the rainfall runoff, and improve the water quality through mimicking natural purification, (ii) expanding, rehabilitating and separating sewerage and stormwater drainage networks and rehabilitating pumping stations to increase their capacities and reliability, (iii) desilting the riverbed of the Nansha River and its tributaries, and (iv) establishing a smart digital platform for drainage, sewerage and associated pumping systems that will be integrated with other existing water management platforms.
2. Component II (Lingyuan): Component II will tackle problems related to inadequate road network and recurrent urban flooding in the city of Lingyuan through (i) expanding and upgrading the urban road network, including main roads, secondary roads, a bridge and ancillary infrastructure such as energy-efficient street lighting systems, traffic management and signal control systems, as well as sidewalks, bicycle lanes and charging facilities, (ii) expanding drainage systems under the urban road network that will be rehabilitated under the Project and separating municipal sewerage and stormwater networks to reinforce the city's flood protection levels, and (iii) establishing a smart platform to collect road condition data, digitalize and keep rehabilitation and maintenance records, develop an optimized road maintenance and improvement program, and enable early warning against urban inundation.

Procurement of contracts financed by NDB will be conducted following the China country procurement system and in compliance with NDB Procurement Policy, and is exclusively open to all eligible bidders from NDB member countries¹.

Specific procurement notices for contracts will be announced, as they become available, on NDB's website and all other websites mandatorily required by domestic policies and requirements.

Interested eligible firms and individuals who would wish to be considered for the provision of goods, works, non-consulting services and consulting services for the above-mentioned project, or those requiring additional information, should contact the Borrower at the address below:

Name of Office: Liaoning Provincial Urban and Renewal Project Management Company
Name of Officer and Title: Mr. Wang Gang, Deputy Manager
Postal Address: No.318, Qingnian Street, Heping District-Room 2414, 24th Floor, E Block, Changxin Landmarks, Shenyang, Liaoning, P.R.China 110004
